- User authentication, control
- Vulnerability management
- SIEM log auditing
- Data loss prevention
- Hypervisors
- Troubleshooting client connectivity issues

EMPLOYMENT HISTORY

IT SUPPORT ASSOCIATE - PART TIME

Crystal Convention Center

Mar 2021 – present

Thiruvananthapur, India

- Collaborated with Network Lead to ensure efficient installation and configuration of network equipment.

- Troubleshoot network issues and resolved connectivity problems to maintain seamless network operations.
- Provided technical support to end-users, addressing network-related concerns and enhancing user satisfaction.
- Documented network procedures, emphasizing ISO 9001:2015 familiarity and its continued relevance within the organization.

SEO Expert

Oct 2016 – Feb 2021

Freelance Consultant

Kochi, India

- Engaged in continuous learning through industry webinars, online courses, and certifications to enhance skills and maintain expertise in SEO.
- Collaborated with a variety of clients to grasp their business objectives and target audience, aligning SEO strategies accordingly.
- Successfully executed link building campaigns, contributing to improved search engine rankings.

EXPERIENCE

SOC Analyst

March 2023– Present

Microsoft Sentinel (SIEM) Personal Project

- Developed custom PowerShell script to extract Windows Event Viewer metadata and derive geolocation data via a third-party API.
- Configured Azure Log Analytics Workspace for seamless ingestion of complex geographic logs, enhancing threat analysis.
- Designed dynamic Sentinel workbook for visualizing global attack data, revealing patterns by location and magnitude.

Cybersecurity Analyst

April 2023– Present

Vulnerability Management Personal Project

- Installed and configured Nessus Essentials for credentialed vulnerability scans on Windows 10 Hosts.
- Led creation of Vulnerability Management Function for sandbox networks, covering Discover, Prioritize, Assess, Report, Remediate, and Verify phases.
- Innovated automated remediation process for preemptive handling of vulnerabilities from updates and third-party software.

System Administrator

June 2023– Present

Active Directory Personal Project

- Automated Active Directory tasks using PowerShell, streamlining user account provisioning and maintenance.
- Set up Remote Access Server (RAS) features, enhancing secure remote resource access.
- Managed Windows DNS, DHCP services, and configured File Servers with quotas and NTFS permissions for efficient data handling and access control.
